

Accelerate Your Cloud Journey with Infoblox on AWS, Azure and Google Cloud Marketplaces

Unified Network Management and Security for Hybrid Cloud

Transform your hybrid cloud experience with Infoblox's enterprise-grade networking and security solutions, trusted by 75% of Fortune 500 companies. Seamlessly manage DNS, DHCP and IP address management (DDI) and strengthen threat defense across your on-premises and public cloud environments.

Get Infoblox products through AWS, Azure and Google Cloud marketplaces and use your existing AWS, Azure and Google Cloud commitments—no extra budget needed.

PUBLIC CLOUD MARKETPLACE ADVANTAGES

Public cloud marketplaces transform how enterprises worldwide find, subscribe to, and deploy software, data, and professional services.

- Simplified Procurement: Streamlined purchasing process through AWS, Azure and Google Cloud marketplaces
- Discount Program Qualification: Counts toward AWS Enterprise Discount Program (EDP), Microsoft Azure Consumption Commitment (MACC) and Google Cloud Committed Use Discounts (CUDs).
- Flexible Licensing: Choose from PayGo or Private Offers
- Fast Deployment: Pre-configured AMLs or Azure VM for quick implementation
- Global Availability: Supported across multiple AWS, Azure and Google Cloud regions

² This offer does not decrement committed spending targets

GETTING STARTED

1. Visit AWS, Azure or Google Cloud Marketplace and search for “Infoblox”
2. Select your preferred solution and deployment model
3. Choose your licensing option
4. Deploy and start managing your hybrid environment

For private offers or enterprise pricing, contact your Infoblox or partner representative or email marketplace@infoblox.com

INFOBLOX PRODUCT AND SOLUTION BENEFITS

Simplified Management

- Single, unified interface for DNS and IP management across hybrid environments
- Real-time visibility into all network devices on-premises and in cloud environments
- Seamless integration with Amazon Route 53, Azure Cloud DNS and Google Cloud DNS
- 69% reduction in staff hours through automated network discovery (Tolly Report: [Infoblox Authoritative IPAM for DNS and DHCP](#))

Enhanced Security

- Industry-leading DNS-based threat detection and response
- Comprehensive security for on-premises, cloud, remote, and branch locations
- 26.5% reduction in data breaches, audits, and fees ([Forrester Total Economic Impact](#) study)
- Customer Success: A [multinational media company](#) strengthened its security posture with Infoblox Threat Defense, preventing unauthorized domain access and protecting intellectual property across their global network, including data centers and AWS cloud locations

Increased Agility

- Automated DNS and IP Address Management
- Eliminate manual handoffs between NetOps and CloudOps teams
- Integration with orchestration tools such as Ansible and Terraform for faster application deployment
- Customer Success: [MYOB](#), a leading financial services company, reduced their DevOps resource provisioning time from hours/days to just minutes using Infoblox automation

Trusted by 13,000+ customers worldwide for mission-critical network services
