Accelerate Your Cloud Journey with Infoblox on AWS and Azure Marketplaces

Unified Network Management and Security for Hybrid Cloud

infoblox

Transform your hybrid cloud experience with Infoblox's enterprise-grade networking and security solutions, trusted by 75% of Fortune 500 companies. Seamlessly manage DNS, DHCP and IP address management (DDI) and strengthen threat defense across your on-premises and public cloud environments.

Get Infoblox products through AWS and Azure Marketplaces and use your existing AWS and Azure commitments—no extra budget needed.

PUBLIC CLOUD MARKETPLACE ADVANTAGES

Public cloud marketplaces transform how enterprises worldwide find, subscribe to, and deploy software, data, and professional services.

- Simplified Procurement: Streamlined purchasing process through AWS and Azure Marketplaces
- Discount Program Qualification: Counts toward AWS Enterprise Discount Program (EDP) and Microsoft Azure Consumption Commitment (MACC)
- Flexible Licensing: Choose from PayGo or Private Offers
- Fast Deployment: Pre-configured AMIs or Azure VM for quick implementation
- Global Availability: Supported across multiple AWS and Azure regions

AVAILABLE SOLUTIONS ON AWS AND AZURE MARKETPLACES

1. **Infoblox Universal DDI Product Suite** (Private Offer)
   - Comprehensive DDI management solution
   - Advanced and integrated portfolio

2. **Infoblox NIOS for DDI** (Private Offer)
   - Enterprise-grade DNS, DHCP and IPAM platform
   - Single point of visibility and control

3. **Infoblox Threat Defense** (Private Offer)
   - Proactive threat detection
   - Redefines hybrid cloud security with NIOS-X as a Service

4. **Infoblox NIOS PayGo**
   - Flexible, usage-based licensing
   - Self-service model for multi-cloud environments

GETTING STARTED

1. Visit AWS or Azure Marketplace and search for "Infoblox"
2. Select your preferred solution and deployment model
3. Choose your licensing option
4. Deploy and start managing your hybrid environment

For private offers or enterprise pricing, contact your Infoblox or partner representative or email marketplace@infoblox.com

INFOBLOX PRODUCT AND SOLUTION BENEFITS

Simplified Management

- Single, unified interface for DNS and IP management across hybrid environments
- Real-time visibility into all network devices on-premises and in cloud environments
- Seamless integration with Amazon Route 53 and Azure Cloud DNS
- 69% reduction in staff hours through automated network discovery (Tolly Report: Infoblox Authoritative IPAM for DNS and DHCP)

Enhanced Security

- Industry-leading DNS-based threat detection and response
- Comprehensive security for on-premises, cloud, remote, and branch locations
- 26.5% reduction in data breaches, audits, and fees (Forrester Total Economic Impact study)
- Customer Success: A multinational media company strengthened its security posture with Infoblox Threat Defense, preventing unauthorized domain access and protecting intellectual property across their global network, including data centers and AWS cloud locations

Increased Agility

- Automated DNS and IP Address Management
- Eliminate manual handoffs between NetOps and CloudOps teams
- Integration with orchestration tools such as Ansible and Terraform for faster application deployment
- Customer Success: MYOB, a leading financial services company, reduced their DevOps resource provisioning time from hours/days to just minutes using Infoblox automation

Trusted by 13,000+ customers worldwide for mission-critical network services
